### THE HUN'S BIGGEST GUN

### German Propaganda Like a Knife Thrust in the Back

By CLARENCE L. SPEED

(Written for the War Committee of the Union League Club of Chicago.)

Smash that damnable Hun propa-  
ganda and we will smash the German  
line.—General Pershing.

General Pershing has seen condi-  
tions at home and he has faced the  
German troops in France. He knows  
that Germany has a powerful war ma-  
chine, but he is not afraid of it. He  
knows that American soldiers are the  
match for the troops of the kaiser, and  
that American spirit "over there" is as  
staunch as man's heart can be.

What General Pershing is afraid of  
—if he knows fear at all—is not the  
high explosive shell, the poison gas, the  
minenwerfer or the machine gun, but  
the secret, treacherous, unhandcuffed  
German propaganda that is still going  
on here in the United States.

#### Secret Propaganda Goes On.

It is certain that the secret German  
propaganda goes on. It reaches into  
the homes and wrings the heartstrings  
of the mothers whose sons are going  
overseas. It sneaks into the factories  
where war work is being done and  
whispers to the workers to slow up. It  
penetrates into the meeting halls of  
labor unions and says "strike." On  
the railroads, where hundreds of thou-  
sands of workers are struggling with  
the greatest congestion this country  
has ever known, the German propa-  
ganda spreads discontent. To the  
farmer it says "hoard" and to the city  
consumer it whispers of extortion and  
profiteering. To the man of business  
it rates of government incompetency  
and inefficiency; and to the derelict,  
the wanderer, the tramp—if you please  
—it preaches the gospel of revolt.

Loves the Pacifist Here.  
Germany, the nation which glorifies  
war above all else, loves the pacifist  
in this country. Peace is the favorite  
topic of conversation among the pro-  
German. They would quit cold, would  
compromise, would do anything, in  
short, except fight out this war to a  
finish and crush forever that menace  
of militarism which, above all things,  
the pacifist is supposed to abhor.

Creating friction and jealousy among  
the nations allied against the kaiser  
is one of the propagandists' most ef-  
fective methods. They are active  
nephews of that group of Americans of  
Irish extraction who are bitter against  
England. They work effectively among  
the half educated who, by superficial  
reading of United States history, have  
been accustomed to regard England as  
America's traditional enemy.

They create distrust and suspicion  
of Japan, and both here and in the  
Orient have so sown the seeds of sus-  
picion that at times it seemed as  
though a conflict must inevitably en-  
sue. Down in Mexico bandits like  
Villa get money and supplies from  
mysterious sources, making necessary  
the holding of a considerable Ameri-  
can force on the border.

How far reaching and well organ-  
ized the German propaganda was in  
this country just before we entered  
the war was shown in 1915 when mem-  
bers of congress were flooded with  
nearly a million telegrams, all of iden-  
tical wording, protesting against the  
shipment of arms to the enemies of  
Germany. The American Embargo  
Conference was the organization be-  
hind these messages. It sprang up al-  
most in a night and a million tele-  
grams cost a lot of money.  
The American Truth society was an-  
other of the organizations which  
seemed to have plenty of funds and  
sought to influence members of con-  
gress in favor of prohibiting the ship-  
ment of arms and ammunition. Then  
there was the German-American Na-

tional Alliance which recently went  
out of business while its activities  
were under fire of congressional inves-  
tigation. The Teutonic Sons of Amer-  
ica and other similar bodies also were  
openly active just before we went into  
the war.

We hear very little of these orga-  
nizations now, but their members are  
still in the United States. It is highly  
improbable that they all experienced a  
change of heart the moment the United  
States declared war.

#### Spread Red Cross Rumors.

They spread the rumors about the  
Red Cross selling its supplies instead  
of giving them to the soldiers for  
whom they are intended.  
They torture American mothers  
with wild stories of shocking immor-  
ality in France—tales which are re-  
futed by the magnificent way in which  
the French armies have stood up  
against overwhelming odds.

They cause unrest by spreading ru-  
mors of food being commandeered in  
the pantries of private homes, and they  
seek, by exaggerating tales of scarcity,  
to cause excessive buying which in-  
creases the scarcity.

They cause the city consumer to be-  
lieve that he is being made the victim  
of extortion, while at the same time  
they tell the farmer he is not being  
paid enough for his grain and live  
stock.

Rumors of the torpedoing of trans-  
ports, with the loss of thousands of  
soldiers, they find particularly effec-  
tive in causing anxiety in the hearts  
of those whose loved ones have gone  
across the seas, or mothers whose  
sons are about to be taken in the  
draft.

All such stories, started originally  
by pro-German propagandists, are of-  
ten spread, innocently enough, by loy-  
al Americans, who repeat them and  
talk about them. Thus they unwill-  
ingly become the tools of the kaiser.  
"Let the German agents who in-  
vented these lies be the only ones to  
pass them on," is the plea of the ad-  
ministration and of ordinary patriotic  
horse sense.

If this is done it soon will be pos-  
sible to spot a man who is in favor of  
Germany just as easily as though he  
were out in the middle of the street  
trampling an American flag.

#### Peril in Foe's Propaganda.

How much more a menace German  
propaganda is than German military  
might is easily seen by the experi-  
ences of Russia and Italy. The un-  
educated Russians, restive under a  
strict autocracy, and fighting, not for  
the principle of democracy, but be-  
cause they were ordered to fight, were  
told that all they need do was to lay  
down their arms and they would have  
peace.

The Italians were told that the  
French and English troops were shoot-  
ing down their wives and children,  
who were starving at home.  
There are hundreds of thousands of  
Americans of German descent who are  
doing all that they can for the cause of  
America. All honor to them. Side by  
side with these loyal citizens, however,  
and sometimes hiding behind their  
cloak are the skulking allies of the  
kaiser.

America now knows or should know  
the danger from these crafty plotters  
and their insidious German propa-  
ganda. And what can we each do about  
it? We can and should challenge ev-  
ery story we hear which smacks of  
German propaganda. Refuse to be a  
story tending to weaken Ameri-  
can morale without the proof.

GREEN-FORD AUTO CO.  
Agents Greenville, Ky.

You know, of course, that the Maxwell Motor Car is the long distance champion of the world.

You have read that a "stock" Maxwell 5-passenger car ran for 44 days and nights without stopping the motor.

And that, in the 44 days non-stop test, the Maxwell covered 22,022 miles, at an average speed of 25 miles per hour.

But have you, up to now, realized the full significance of that performance?

Do you know that no other motor car in the world has ever equalled or even approached that performance?

In a word, did you take this test seriously when you heard of it?

Or did you set it down as a "selling stunt" to give the publicity man something to talk about?

It's worth your while to read and to study the conditions under which that test was made.

You know that the American Automobile Association (familiarly known as the "A.A.A.") is the official arbiter of every automobile test and contest.

But perhaps you didn't know that when a maker places his product under A.A.A. supervision he must do absolutely as told and abide by the decisions of the Board. That's why there are so few A.A.A. Official Records!

This 22,000-mile Maxwell non-stop test was official from start to finish.

Therein lies its value to you.

It proves absolutely the quality of the car—of the very Maxwell you buy.

For verily this was a "stock" Maxwell. Listen:—

First: the inspectors disassembled the motor to see that no special pistons, valves, bearing-metal or other parts had been used.

Every other unit was as critically inspected. Then the car was re-assembled under their own supervision.

As we had much at stake and the test was made in winter (November 23 to January 5) we asked permission to take certain little precautions against accidental stoppage.

Sounds reasonable, doesn't it?

But they refused permission to do any such thing.

For example:—They would not permit a rubber cover over the magneto—it wasn't "stock."

They refused to let us tape the ignition wire terminals—they are not taped on the Maxwells we sell—so of course it wasn't "stock."

Neither would they let us use a spiral coiled pipe in place of the usual straight one from tank to carburetor to guard against a breakage from the constant, unremitting vibration—it isn't "stock."

Nor to use a special high priced foreign make of spark plug—the run was made on the same spark plugs with which all Maxwells are equipped.

So rigid were the rules, we were unable to carry a spare tire on the rear—it wasn't "stock." A telegram to headquarters in New York finally brought a special permit to carry a spare tire.

"It isn't stock!" "It isn't stock!"

That was the laconic reply of those A.A.A. inspectors to every last suggestion that called for anything but the precise condition of the standard, stock model Maxwell that any customer can buy from any one of 3000 dealers anywhere.

We are glad now—mighty glad—that the rules were so strict and so rigidly enforced.

Any other car that ever attempts to equal that record must do it under official supervision—and comply with the same terms.

And it will have to go some.

For Maxwell set the standard when it performed this wonderful feat.

Maxwell complied with those rules—and made good.

Every drop of gasoline and oil and water was measured out and poured in by the inspectors themselves. They would not even let our man pour it in!

Every four hours the car had to report at the official station for checking.

And it had to be there on the minute.

And every minute there was an inspector beside the driver on the front seat—two more men in the rear. One got out only to let another in—day and night for 44 days and nights!

There was one technical stop.

It is interesting to know the circumstances.

Dead of night—a driving storm—a cloudburst—suddenly another car appeared in the road ahead.

In his effort to avoid a collision the Maxwell driver stalled his motor.

At least the observers thought it stopped and so reported.

The car did not stop, however, so its momentum again started the motor (if it had indeed stalled) when the clutch was let in.

The contest board exonerated our driver on grounds that his action was necessary to save life.

That shows you how rigid were the rules—how conscientiously applied by the observers.

You who have owned and driven motor cars—you who know how small a thing may clog a carburetor or a feed pipe; "short" a spark or stall a motor—will realize what a wonderfully well made car this must be to go through that test under those conditions—44 days—22,022 miles without stopping.

The exact amount of gasoline, of oil, of water used; the tire mileage, tire troubles, tire changes; the distance and the routes are matters of official record, attested under oath and guaranteed by the A. A. A.

(By the way, the average was nearly 10,000 miles per tire.)

Any Maxwell owner—or anyone interested may see those records.

And—here's the most wonderful part—though no attempt was or could be made for economy; the Maxwell averaged 22 miles per gallon of gasoline.

Some other car may, some time, equal some one of those performances. But to equal them all in the same test—that car must be a Maxwell.

Greenville, Ky.

THURSDAY, AUGUST 1, 1918.

Entered at the Greenville, Ky., postoffice as second-class matter.

--- This paper has enlisted with the government in the cause of America for the period of the war ---

For Congress.

We are authorized to announce  
JAY HENRY HEN HENRY  
of Warren county, a candidate for Congress from the Third Congressional district, subject to the action of the Democratic primary to be held in August, 1918.

Among the new soft drinks that are being popularized by the war is aqua pura.

KEEPING very busy at some useful employment is another way of escaping heat stroke.

This country never did anything much wiser than getting its rivers into shape to carry heavy traffic.

GERMANY always argued that war was a great tonic. It is being forced to take large doses of its own medicine.

EVERYBODY'S sugar allowance may be cut down, but the world will be sweet enough with the German armies on the run.

FEEDING the nation on a sugar ration is a great help to the frugal young man whose girl is trained and accustomed to bonbons.

ACCORDING to Mr. Hoover, the pig has solved the meat problem. And one had never imagined that the pig was good at mathematics.

VARIOUS members of congress who were not heartily for the war are making excuses for not being able to return to Washington next year.

If Russia is coming back now is the time. That country will find it difficult to save its face if it waits until the allies have finished the job.

SINCE patches have become honorable, says Old Man Doodle, you can tell by a man's patches whether he is addicted to praying much or just sitting around.

RIGHTOUSNESS would not be righteousness did it make terms with unrighteousness. There can be no peace that is not based on justice, honor and restitution.

ANOTHER way of putting it is this: In a biological sense the old idea of individualism and overfords and supermen is passing. The human race is to accomplish things henceforth by working in groups.

At a county fair in Scotland the other day a shilling was charged for a snuff at a bottle of o'd Scotch whisky. If a snuff means a "snootful" in the language of the thistle parlor, the price was not exorbitant.

Jail Inmates Are Not Musicians.

Last Sunday afternoon when persons gathered at the Louisville jail to give their usual religious talks and service of song, the organist who accompanies them, was absent. A request was made for a volunteer organist, but with more than 300 inmates, not one could play. The speaker commented upon the situation, and told the men and women that if they had learned about music, probably very few of them would have been there, as the rendering and uplifting influences of music would have led their steps on higher planes, and he exhorted them to yet learn music, and save themselves from further dishonor.

Old newspapers for sale at this office.

## FOR BETTER ROADS

### IMPROVING THE BAD SPOTS

Certain Small Ruts That Are Usually Wet and Soft Determine Load Farmer Can Carry.

The worst holes in the road always determine the load the farmer can market. No stretch of roadway is uniformly good, because every road has certain small spots that are usually soft and wet. These spots cause more trouble than the rest of the road combined. How these spots are to be improved depends on the character of the soil, and the nature of the country. Many such spots owe their character to a soft subsoil, due to springs. Before these roads can be permanently improved they must be underdrained. If a tile is laid in these places there will usually be no trouble in the future. The surface of the road should then be filled with dirt and crowned, so any surface water may run off. If this is done there will be no trouble from subsurface water. Many roadways that are closed in with shade trees are had. If a goodly portion of the scrub timber along these roads be removed, the ground will dry out and no trouble result. If the character of the soil is soft and pliable, so that it will not pack and remain firm, new material should be applied to the surface. The best and cheapest material for improving roads is gravel. Where gravel beds are accessible a day's work with a team and wagon will improve any roadbed permanently. If the soil is very sandy an 8-inch application of clay to the surface will effect wonders. The road patrol should spend a considerable portion of its time in remedying the bad spots in the road.

### ANSWER TO PRISON PROBLEM

New York and Other States Have Tried Experiment of Using Convicts to Improve Roads.

New York and many of the Southern and Western states have tried the experiment of using convicts to improve highways—and it has worked to perfection. The official organ of the New York state prisoners says that "no man of all the inmates who went outside last year had a word of fault to find with his treatment. All are anxious to join those camps again. The freedom of movement and the exer-

Convict Gang at Work.

cise shortens the time yet to do in a wonderful manner. Many states have found road work to be the answer to the prison problem. Colorado and California have rebuilt the better portion of their roads with prison labor, and besides feeding the inmates with an extra supply of food, it has also led to a lessening of time through provisions made by the farsighted legislators.

### WIDE TIRES IMPROVE ROADS

They Have Same Effect on Country Highway as Roller on Field—Also Pull Easier.

Wide tires build up roads and save horse labor. They have the same effect upon a country road as a roller on a plowed field. On the other hand, the narrow tire cuts up a road like a disk. It has been found by actual test in this matter that the wide-tired wagon pulls easier in nearly all cases than the narrow-tired wagon. In deep mud on a country road the wide-tired wagon pulls 6.2 per cent easier. On the country road with a thin surface of mud or deep dust, however, the narrow tires pull 4.9 per cent easier. In a cornfield the wide tires pull 30.5 per cent easier, in a dry alfalfa field 17.7 per cent easier, and on a dry country road 10.2 per cent easier.

Ontario Makes Good Roads. The Province of Ontario has approximately 55,000 miles of roads. More than 43,000 miles have been treated and are in fairly good condition. About 20,000 miles are well graded earth roads, about 8,000 miles are surfaced with broken stone, and about 19,000 are surfaced with gravel.

All Roads Lead Home.

All roads lead to home. You are not at fault if they are not all good roads, but you are to blame if it's not a good home.

Roark is in better position to give you Victrola and record service than many dealers in cities of 10,000 inhabitants. Orders are placed many months ahead, and stock is larger here than can be found elsewhere, in Victor goods, which have always been hard to get, on account of the world-wide demand, and more difficult to get now than ever before.

### The Federal Explosive Law.

The Federal Explosives Act prohibits the manufacture, sale, purchase and possession of all explosives and their ingredients, in time of war, without a license. In other words, the dealer must keep an itemized record showing the name and address of purchaser, his license number, kind and quantity of explosives purchased, and purpose for which it is to be used. This also compels practically every drug store in the United States to have a license permitting them to have in possession and sell explosives ingredients, and the buyer must have a license when purchasing these ingredients in quantities of an ounce or more, and the dealer must keep the same record as the party who sells dynamite. These ingredients are: Bichromates, Chlorates, Chromates, Nitrates, Nitric Acid, Perchlorates, Peroxides, Permanganates, Peroxides and Phosphorus, in their various forms.

This law will be rigidly enforced in the future; it having been in effect since November 15, 1917, and every dealer has had time to familiarize himself with the law and all its details, and no excuse will be accepted in the future. Violation of this Act carries a penalty of \$5,000 fine or imprisonment in a Federal prison, or both. A careful and systematic check is being made, by Federal Authorities, of every dealer in the State who handles explosives or ingredients, regardless of location or size. An inspector or some deputy may drop in any day, and dealers should not allow themselves to be caught unprepared.

There is a United States Explosives Licensing Officer in every County, and such dealers as have not already procured their license should take immediate steps to do so.

This is considered one of the most important war measures enacted by our Congress, and dealers can not be too careful in making sales of explosives or their ingredients.

More Victrolas are in use of the public schools of America than all other machines combined. Two years ago there were 6,200 schools using Victrolas, and a careful census, just completed, shows that more than 25,000 schools use this one machine. This is a quadrupling in two years, and shows how the influence of music is growing, and also how the superiority of the Victrola is appreciated. See and hear why at Roark's.

You can get any other machine you want, at any time, but you will keep the Victrola forever, when you get it. Better wait for the one you want, and which so many people all over the world want, that deliveries are behind the demand. Roark expects liberal shipments soon, or orders placed many months ago.

Small rooms can be papered at half, from Roark's remnants.

We're here to help you get the best results and the most satisfaction from your talking machine, no matter what make, and our eight years' experience is freely at your command, and should be of benefit to you. The J. L. Roark Estate.

Many new records can now be found at Roark's, in Victor shipments of the week.

### Sharp Practices Cannot Endure.

For eight years we have been distributing Victrolas in Muhlenberg, and our faith in them is much stronger now than when we secured the agency, for the decision reached then, after an exhaustive study of all machines on the market, led us to the Victrola, and its performance has given most complete satisfaction to every purchaser, so much so that from first to last machines sold by us are in the hands of the original purchasers. The field is enlarging rapidly, and in time practically every home will have some sort of machine. It is to our interest, and to the vital interest of every buyer, that the most thorough investigation be made in the selection of this item. We have at all times a representative stock of instruments and records, and gladly give public demonstrations. Records of all machines will be played, and the most thorough investigation and comparison of both machines and records should be made by you, and are invited by us. No sharp practices have ever been used by us in making a sale, we will not resort to trickery, "double-decking" of records in the making of demonstrations, and other hoodwinking acts and statements followed by some dealers. Everybody gets a square deal from us, before and after a sale, and we refer to our large family of Victrola users, our best incentive and greatest asset in the continual enlargement of this branch of our establishment. Very truly, yours,  
THE J. L. ROARK ESTATE,  
Orion L. Roark, Manager.

### Booze-Blockade Runners Hit Shoals.

People who are "resistive" under the bone-dry law, and attempt to nullify the new law by bringing whisky into such prohibited spots are running into large bunches of trouble. Local officers everywhere are on the alert, and hundreds of men have been caught and fined, and the prison section is being pretty generally enforced, too. Auto transfer is a popular way to bring in the contraband goods, but it is not likely it will continue so, for this mode of transportation is getting extra eyes from policemen, and their success is discouraging the movement. Several men from Muhlenberg have been caught and fined.

There is not a talking machine made which will not play Victor records, and Roark has a great supply.

Large stock of mirrors at Roark's Small prices.

Get your order placed with Roark for a Victrola, as for months there has been a waiting list, on account of the world-wide strong demand for this instrument. While large stocks of machines are always on hand, it has been many a moon since all type instruments have been here at one time.

### Nation-Wide Preparedness

North, South, East, West—all working to put the Nation in fighting trim!

Army and Navy departments and districts, camps, yards, coast-guard stations, light houses, munition, construction and textile plants—all co-ordinating to mould the vast organization into an effective homogeneous force! And in this enormous task the country's telephone network has been and will continue to be the great indispensable agent of communication.

The Bell system has enlisted every resource at its command and offered all unreservedly to the government.

This, together with the immensely increased commercial demand for service, the general shortage of materials, and the enlistment and draft of a large number of technically trained employees who cannot be replaced, will, it is hoped, be borne in mind by every loyal American if there should later result the necessity for subordinating private convenience to the pressing needs of the government.

We are not sitting idly by and waiting for a bright day when our money can buy equipment. We are using every means at our command to keep our service up to its usual high standard. You will want to help because you will be helping your own service and enabling us to do a better job for Uncle Sam.

We appreciate co-operation.

**THE RECORD**  
An Independent Newspaper.  
PUBLISHED THURSDAY BY  
**RECORD PRESS,**  
ORION L. ROARK, EDITOR.  
Long-Distance Telephone, No. 72.  
Office in Annex near Roark store, ground floor.  
50 CENTS PER YEAR IN ADVANCE.

**TERMS.**  
The subscription price of the paper is payable in advance, and when the time has expired it is paid, the paper will be stopped.  
Cards of thanks, obituary notices, etc., if not longer than ten lines, will be published free. A charge of 50c per line will be made for success-ful lines. No variation of this rule to anyone.  
Free sample copies will be mailed.  
Advertisements will be inserted. A rate card will be furnished on request.  
Address all communications and make all remittances payable to **RECORD PRESS,** Greenville, Ky.

**THURSDAY, AUGUST 1, 1918.**  
Printed at the Greenville, Ky., postoffice as second-class matter.

**FOR BETTER ROADS**  
This paper has enlisted with the government in the cause of America for the period of the war.

**For Congress.**  
We are authorized to announce **JACK HENRY H. BENTLEY** of Warren County, a candidate for Congress from the Third Congressional district, subject to the action of the Democratic primary to be held in August, 1918.

Among the new soft drinks that are being popularized by the war is aqua pura.

Keeping very busy at some useful employment is another way of escaping heat stroke.

This country never did anything much wiser than getting its rivers into shape to carry heavy traffic.

GERMANY always argued that war was a great tonic. It is being forced to take large doses of its own medicine.

EVERYBODY'S sugar allowance may be cut down, but the world will be sweet enough with the German armies on the run.

Having the nation on a sugar ration is a great help to the frugal young man whose pig is trained and accustomed to bonbons.

According to Mr. Hoover, the pig has solved the meat problem. And one had never imagined that the pig was good at mathematics.

VARIOUS members of congress who were not heartily for the war are making excuses for not being able to return to Washington next year.

It Russia is coming back now is the time. That country will find it difficult to save its face if it waits until the allies have finished the job.

SINCE patches have become honorable, says Old Man Doodle, you can tell by a man's patches whether he is addicted to praying much or just sitting around.

RIGHTOUSNESS would not be righteous did it make terms with unrighteousness. There can be no peace that is not based on justice, honor and restitution.

ANOTHER way of putting it is this: In a biological sense the old idea of individualism and overflows and surpluses is passing. The human race is to accomplish things henceforth by working in groups.

At a country fair in Scotland the other day a shilling was charged for a snuff at a bottle of old Scotch whisky. If a snuff means a "snootful," in the language of the thistle parlor, the price was not exorbitant.

**Jail Inmates Are Not Musicians.**

Last Sunday afternoon when persons gathered at the Louisville jail to give their usual religious talks and service of song, the organist who accompanies them, was absent. A request was made for a volunteer organist, but with more than 300 inmates, not one could play. The speaker commented upon the situation, and told the men and women that if they had learned about music, probably very few of them would have been there, as the relaxing and uplifting influences of music would have led their steps on higher planes, and he exhorted them to yet learn music, and save themselves from further dishonor.

Old newspapers for sale at this office.

**FOR BETTER ROADS**

# IMPROVING THE BAD SPOTS

Certain Small Ruts That Are Usually Wet and Soft Determine Load Farmer Can Carry.

The worst holes in the road always determine the load the farmer can market. No stretch of roadway is uniformly good, because every road has certain small spots that are usually soft and wet. These spots cause more trouble than the rest of the road combined. How these spots are to be improved depends on the character of the soil, and the nature of the country. Many such spots owe their character to a soft subsoil, due to springs. Before these roads can be permanently improved they must be underdrained. If a tile is laid in these places there will usually be no trouble in the future. The surface of the road should then be filled with dirt and crowned, so any surface water may run off. If this is done there will be no trouble from subsurface water.

Many roadways that are closed in with shade trees are had. If a goodly portion of the scrub timber along these roads be removed, the ground will dry out and no trouble result. If the character of the soil is soft and pliable, so that it will not pack and remain firm, new material should be applied to the surface. The best and cheapest material for improving roads is gravel. Where gravel beds are accessible a day's work with a team and wagon will improve any roadbed permanently. If the soil is very sandy an 8-inch application of clay to the surface will effect wonders. The road patrol should spend a considerable portion of its time in remodeling the bad spots in the road.

# ANSWER TO PRISON PROBLEM

New York and Other States Have Tried Experiment of Using Convicts to Improve Roads.

New York and many of the Southern and Western states have tried the experiment of using convicts to improve highways—and it has worked to perfection. The official organ of the New York state prisoners says that "no man of all the inmates who went outside last year had a word of fault to find with his treatment. All are anxious to join these camps again. The freedom of movement and the exer-

else shortens the time yet to do in a wonderful manner. Many states have found road work to be the answer to the prison problem. Colorado and California have rebuilt the better portion of their roads with prison labor, and besides feeding the inmates with an extra supply of food, it has also led to a lessening of time through provisions made by the far-sighted legislators.

# WIDE TIRES IMPROVE ROADS

They Have Same Effect on Country Highway as Roller on Field—Also Pull Easier.

Wide tires build up roads and save horse labor. They have the same effect upon a country road as a roller on a plowed field. On the other hand, the narrow tire cuts up a road like a disk. It has been found by actual test in this matter that the wide-tired wagon pulls easier in nearly all cases than the narrow-tired wagon. In deep mud on a country road the wide-tired wagon pulls 6.2 per cent easier. On the country road with a thin surface of mud or deep dust, however, the narrow tires pull 4.9 per cent easier. In a cornfield the wide tires pull 30.5 per cent easier, in a dry alfalfa field 17.7 per cent easier, and on a dry country road 10.2 per cent easier.

# Ontario Makes Good Roads.

The Province of Ontario has approximately 55,000 miles of roads. More than 43,000 miles have been treated and are in fairly good condition. About 20,000 miles are well graded earth roads; about 3,000 miles are surfaced with broken stone, and about 19,000 are surfaced with gravel.

# All Roads Lead Home.

All roads lead to home. You are not at fault if they are not all good roads, but you are to blame if it's not a good home.

Roark is in better position to give you Victrola and record service than many dealers in cities of 10,000 inhabitants. Orders are placed many months ahead, and stock is larger here than can be found elsewhere, in Victor goods, which have always been hard to get, on account of the world wide demand, and more difficult to get now than ever before.

# The Federal Explosive Law.

The Federal Explosives Act prohibits the manufacture, sale, purchase and possession of all explosives and their ingredients, in time of war, without a license. In other words, the dealer must keep an itemized record showing the name and address of purchaser, his license number, kind and quantity of explosives purchased, and purpose for which it is to be used. This also compels practically every drug store in the United States to have a license permitting them to have in possession and sell explosives ingredients, and the buyer must have a license when purchasing these ingredients in quantities of an ounce or more, and the dealer must keep the same record as the party who sells dynamite. These ingredients are: Bichromates, Chlorates, Chromates, Nitrates, Nitric Acid, Perchlorates, Peroxides, Permanganates, Peroxides and Phosphorus, in their various forms.

This law will be rigidly enforced in the future; it having been in effect since November 15, 1917, and every dealer has had time to familiarize himself with the law and all its details, and no excuse will be accepted in the future. Violation of this Act carries a penalty of \$5,000 fine or imprisonment in a Federal prison, or both. A careful and systematic check is being made, by Federal Authorities, of every dealer in the State who handles explosives or ingredients, regardless of location or size. An inspector or some deputy may drop in any day, and dealers should not allow themselves to be caught unprepared.

There is a United States Explosives Licensing Officer in every County, and such dealers as have not already procured their license should take immediate steps to do so.

This is considered one of the most important war measures enacted by our Congress, and dealers can not be too careful in making sales of explosives or their ingredients.

More Victrolas are in use of the public schools of America than all other machines combined. Two years ago there were 6,200 schools using Victrolas, and a careful census, just completed, shows that more than 25,000 schools use this one machine. This is a quadrupling in two years, and shows how the influence of music is growing, and also how the superiority of the Victrola is appreciated. See and hear why at Roark's.

You can get any other machine you want, at any time, but you will keep the Victrola forever, when you get it. Better wait for the one you want, and which so many people all over the world want, that deliveries are behind the demand. Roark expects liberal shipments soon, or orders placed many months ago.

Small rooms can be papered at half, from Roark's remnants.

We're here to help you get the best results and the most satisfaction from your talking machine, no matter what make, and our eight years' experience is freely at your command, and should be of benefit to you. The J. L. Roark Estate.

Many new records can now be found at Roark's, in Victor shipments of the week.

# Sharp Practices Cannot Endure.

For eight years we have been distributing Victrolas in Muhlenberg, and our faith in them is much stronger now than when we secured the agency, for the decision reached then, after an exhaustive study of all machines on the market, led us to the Victrola, and its performance has given most complete satisfaction to every purchaser, so much so that from first to last machines sold by us are in the hands of the original purchasers. The field is enlarging rapidly, and in time practically every home will have some sort of machine. It is to our interest, and to the moral interest of every buyer, that most thorough investigation be made in the selection of this item. We have at all times a representative stock of instruments and records, and gladly give public demonstrations, and comparison of both machines and records should be made by you, and are invited by us. No sharp practices have ever been used by us in making a sale, and we will not resort to trickery, "double-decking" of records in the making of demonstrations, and other hoodwinking acts and statements followed by some dealers. Everybody gets a square deal from us, before and after a sale, and we refer to our large family of Victrola users, our best incentive and greatest asset in the continual enlargement of this branch of our establishment. Very truly, yours, THE J. L. ROARK ESTATE, Orien L. Roark, Manager.

# Booze-Blockade Runners Hit Shoals.

People who are festive under the bone-dry law, and attempt to nullify the new law by bringing whisky into such prohibited spots are running into large bunches of trouble. Local officers everywhere are on the alert, and hundreds of men have been caught and fined, and the prison section is being pretty generally enforced, too. Auto transfer is a popular way to bring in the contraband goods, but it is not likely it will continue so, for this mode of transportation is getting extra eyes from policemen, and their success is discouraging the movement. Several men from Muhlenberg have been caught and fined.

There is not a talking machine made which will not play Victor records, and Roark has a great supply.

Large stock of mirrors at Roark's Small prices.

Get your order placed with Roark for a Victrola, as for months there has been a waiting list, on account of the world-wide strong demand for this instrument. While large stocks of machines are always on hand, it has been many a moon since all type instruments have been here at one time.

**SUNSET MAGAZINE** SAN FRANCISCO CALIFORNIA

# Nation-Wide Preparedness

North, South, East, West—all working to put the Nation in fighting trim!

Army and Navy departments and districts, camps, yards, coast-guard stations, light houses, munition, construction and textile plants—all co-ordinating to mould the vast organization into an effective homogeneous force! And in this enormous task the country's telephone network has been and will continue to be the great indispensable agent of communication.

The Bell system has enlisted every resource at its command and offered all unreservedly to the government.

This, together with the immensely increased commercial demand for service, the general shortage of materials, and the enlistment and draft of a large number of technically trained employees who cannot be replaced, will, it is hoped, be borne in mind by every loyal American if there should later result the necessity for subordinating private convenience to the pressing needs of the government.

We are not sitting idly by and waiting for a bright day when our money can buy equipment. We are using every means at our command to keep our service up to its usual high standard. You will want to help because you will be helping your own service and enabling us to do a better job for Uncle Sam.

We appreciate co-operation.

## Local Mention.

Enters August.

The White is King.

Rural schools start Monday.

Rubber fly swatters at Roark's.

Hear the August Victor records at Roark's.

Mr. D. J. Duncan was here from Bowling Green a few days during the week.

Use a Cleanrite brush on your Victrola, getting better results and protecting your records.

Mr. Mc. Ferguson, of South Carrollton, was among the court visitors here Monday.

Several one-room patterns of wall paper at Roark's are offered at cut prices.

Make your arrangements to attend the County War Conference here on Friday, August 9, all day.

Wheeler & Wilson sewing Machine No. 9, in good working order, for sale. Apply at this office.

Work and vote for the new road tax, at special election to be held on Saturday, Aug. 24.

A hair mattress lasts a lifetime, and gives greatest service. Get one from Roark.

Dog license tags are now ready, and the new ordinance will be put in full force at once.

Two stalls, in a stable, for rent by day or month. Apply to Mrs. T. G. Bohannon.

Cantaloupes are now plentiful and fine, and are selling at 5 cents each, with a strong demand.

The largest stock of talking machine records to be found in this part of Kentucky can be found at Roark's.

Mr. Hugh Lewis was here from Camp Lewis last Sunday, visiting his parents and mingling with his many friends.

Standard in price and quality, the Victrola stands on a pinnacle. Have fullest demonstrations and comparisons at Roark's.

Mrs. Herman Young, of Louisville, is here on a visit to her sister, Mrs. E. L. Yonts.

The Victrola, with many exclusive features, is supreme. A demonstration convinces. Roark will be glad to meet any test.

Mr. S. D. Bradley was here from Louisville the latter part of the week, mingling with friends and customers.

Buy the best value in America piano, the Lyon & Healy, from Roark, county distributor.

Rains have been very general throughout this section during the week, and have done a vast amount of good.

Get satisfaction—buy a Victrola, for it constantly delivers the best instrumental and vocal music of the world, without expense and worry.

Hon. R. V. Thomas, Jr., who is spending some time in this Congressional district, was mingling with his friends here the latter part of last week.

Careful painting, many months ahead, enables Roark to be in position to supply your Victrola and record wants much better than dealers in many large cities can do for you.

Some people are getting so much profit of various kinds out of their war gardens that they are thinking of having themselves arrested for shameless profiteering.

## Muhlenberg War Conference Here August 9.

County War Conferences are being held all over the United States, to bring to the people of every section, however remote, the true conditions of this country in relation to the world war, and just what our people need and must do to help win it. Muhlenberg will observe this day on Friday, August 9, in an all-day meeting here, and it is expected that many thousand of our people will attend. A special program is arranged, with prominent local and visiting speakers, among the latter being a soldier who has been on the French line, and has been sent home on account of injuries. There will be no admission fee, and no appeals will be made for funds of any kind, but all who attend will be roused to heights of patriotism not hitherto attained.

See the "Restgood" line of hair mattresses and pillows at Roark's.

Mr. W. H. Reynolds is home for a few days, after a tour of western Kentucky.

Hear the August Victor records and hundreds of others at Roark's.

The dog catcher is now on the path, for tags are here, and owners who want to keep their dogs will save extra expense by licensing them at once.

Roark maintains two demonstration rooms, for display of Victrolas and demonstration of records. Drop in any time, whether you wish to purchase or not.

Golden Star furniture polish, best made, at Roark's.

Only thing that hasn't advanced in price—a large purchase keeps the rubber fly swatter at Roark's.

Trade with Roark, who teaches your dollars to have more cents.

Everybody can vote on the new road tax, but only property owners will have any tax to pay, and that will be only 20 cents on the \$100.

The Victor tungs-tone supplies your need in needles. See Roark.

It was a fine crowd here to court Monday, and business was brisk, in all lines, but the threatening weather drove the people home soon after noon.

Snaps in high grade wallpaper at Roark's.

The tax under the new law for road purposes will be only about \$2 per year, average, for farm owners, and the benefits will be many fold that sum.

No matter what sort of talking machine you have, you can exchange it for a Victrola, and Roark will give you fullest allowance.

See the strong line of Victrolas on Roark's floor.

Found—Eyeglasses, rimless, riding bow, in leather case. Owner can secure same by proving property and paying for notice. Apply this office.

The prosperity of the county depends as much on good roads as any other one feature, and a rousing majority should be given for it at the special election Saturday, Aug. 24.

Worm gears, with ball-bearing points, the Victrola motor surpasses the bevel-gear motors in other machines to same degree it does in every other feature.

Needles and all sorts of sewing machine supplies at Roark's.

Slackers are having a harder time than ever getting by, as practically everybody is now strong for this country, and that every man shall do his part.

Nothing half so good—get a rubber fly swatter from Roark.

The ground contained more moisture from Friday night rains than it has in many months. The accom. panying wind did some damage by blowing corn down, but this was small compared to the great benefit received.

Silent, swift, simple, strong, the White is the greatest sewing machine on the market. Full line on the floor at Roark's, and you are asked to see them.

## 25,000 Women Wanted to Enroll in the U. S. Student Nurse Reserve.

The Kentucky Division, Women's Committee, Council of National Defense, has been asked to recruit 750 young women of sound physical and mental qualifications, for nurses training to release American graduate nurses for service in the military hospitals overseas. It is officially stated by the Federal authorities in Washington that 25,000 such students are needed now, to form a "United States Student Nurse Reserve."

The chairman of the National Women's Committee states the need as follows:

"What is needed is the enrollment of 25,000 physically fit young women between the ages of 19 and 35, having full high school training wherever possible, and preferably college training. Enrollment in the Student Nurse Reserve means that the candidate will hold herself ready until April 1, 1919 to take training when she is offered an assignment in a training school, unless she has in the meantime entered other government war service."

Every woman who completes the training course satisfactorily may be eligible for enrollment as a Red Cross nurse and stands a chance of being assigned to duty abroad. At the same time she will be qualified to earn her living in one of the noblest professions open to women.

The work of the nurse is a national service for women which seems more nearly the equivalent of the Army and Navy service for men than any other. She stands side by side with the fighting force in the first line of defense and out of the fearful waste and havoc of war she saves numberless precious lives, besides helping to protect our men from the scourge of disease, which is often more deadly than bullets. She also relieves the suffering and boosts the courage and spirit of wounded and battered men.

The important thing to remember is that as a student recruit in the hospital training school you are actually rendering a vital service to your country from the moment you enter, for you become at once a member of the national life-saving corps and each day you are steadily advancing to more and more responsible and varied duties and steadily preparing to replace a graduate nurse on the firing line. The opportunities for service to your country and of benefit to your future welfare are too numerous to even mention in this article, but if you are interested you can secure leaflets which give detailed information on this subject or you can enlist with Miss Jessie Barkley, in Moore's and Tanner's office, who is acting as recruiting officers for Muhlenberg county. Let's keep up the standard already set by Muhlenberg county and Kentucky.

## Patriots Are Shown to Be Traitors.

Some of those "dollar-a-year" patriots serving the Government have proven themselves arch traitors, of the "million-a-month" type, and are being hunted out in connection with the vast stealings of various kinds. Their low salary should not be accepted as an excuse for whitewashing these scoundrels, who should be given the limit of the punishment allowed by law.

## Notice to the Public.

Notice is hereby given that all persons being indebted to me can settle their account with Mr. H. O. Meredith, who has this part of my business in his hands, and is ready to serve my patrons. 2t.

Dr. H. V. Slaton.

Examine the line of "Restgood" all-hair mattresses at Roark's. Finest line of goods ever carried in this section, and the cheapest, for one will give perfect satisfaction for an ordinary lifetime. Pillows of same material.

Mr. Spencer Pannell arrived home last week from Russellville, where he has been engaged as supervising inspector of highway construction. For some time he has not been feeling well, and he has developed a case of typhoid fever, but is getting along very nicely, though his fever did run very high for a few days.

Everybody pays the same price for the Victrola, while no two persons pay the same amount for other machines. Buy the machine of recognized, superior qualities from Roark.

## Facts For Digestion.

One of America's leading lecturers recently addressed a representative body of people on the war and our participation in it. He declared that many hundreds of millions of dollars had been made by our people from supplies furnished this and foreign governments, but that our people did not really know what war meant, compared with our European allies. They have given to the limit in men and means, and the civilian population for years has undergone the greatest hardships. What we may be required and prepared to do was summed up thus: "Fourteen per cent of all the living people in Scotland, old and young, male and female, are fighting at the front. Thirteen per cent of all the people in England are fighting at the front. Six per cent of the Irish are fighting civilization's common foe, England's draft age is 18 51. Scotland has practically sent one man out of each seven of its population. America has not yet sent one out of each hundred."

Dr. H. Y. Slaton, who volunteered for medical corps service, left the first of the week for Camp Oglethorpe, Ga. He was accompanied by his wife, who will remain with him until he departs for overseas, which he expects to do soon.

Most for your money in a Victrola. Cut prices show a weakness in the goods and any machine except a Victrola can be bought by anyone at a reduced price.

Patriotic traveling men all over the country are helping Uncle Sam and teaching many people to save by giving thrift stamps as tips. The idea was started by a thoughtful fellow some bit ago, and it is spreading with gratifying results.

The Flonzaley String Quartet has made its first record, to be found in the August list, at Roark's. This is recognized as the most artistic organization in America, and during its 15 years' organization has drawn the most devoted circle of admirers, for its work is not equaled by any associated artists.

Public schools open in Muhlenberg next Monday, and every effort is being made to start with full attendance, and keep it up to the mark, as the advantages of education are more appreciated now than ever before in the history of the world, and each child is being impressed with how important it will be in their lives.

Good on all occasions, but why not start the enjoyment of a Victrola at Easter time? You will always remember the beginning with great pleasure. Arrange at once with Roark and have an instrument delivered when you say.

Look at Roark's stock of chairs and rockers—greatest in county.

## Victrola Dominance Grows.

Victrola dominance is greater today than ever before. The latest in the field of standard machines, it quickly emerged from the rest. It has added many vital and exclusive features of construction, and has overtaken everything except demand and while the Victor Co. is annually expending millions in buildings, machinery and equipment, the world calls for more in greater degree each year. Roark places orders many months ahead, and that is why you can place an order now and get what you wish from him.

The Victrola, sterling as the English pound, sells for the same just price, the world around.

Many new Victor records received by Roark this week.

Who knows more about music than the world's greatest artists? They have chosen the Victrola for the exclusive presentation of their rare art and talents, and their rare art and talents, and their vital opinion is the safest guide for every purchaser of a talking machine. Let Roark demonstrate the supreme Victrola and records.

**RED CROSS VANISHING CREAM**  
(WITH PEROXIDE)  
A greenless cream of snowy whiteness. Delightfully perfumed. A day cream for oily skins. Softens the hard lines of the face. Protects it from sunburn, winds, fogs and cold weather. Acts as an excellent foundation for applying Amrico Beauty Face Powder. This and more than one hundred other Red Cross Remedies and Toilet preparations sold and guaranteed only by

R. F. Jarvis, Greenville, Ky.

## Diphtheritic Paralysis.

One of the characteristic symptoms, or rather sequels of diphtheria is a more or less extensive paralysis. It usually comes on after the casting off of the membrane in the throat—sometimes not until several weeks after—but it may appear during the attack, the gravity of which it greatly increases. It is probably the result of a neuritis, or inflammation of certain nerves, brought on by the action of the diphtheria toxin.

Diphtheritic paralysis usually manifests itself in the throat muscles which lose their tone and fail to act during the process of swallowing so that the fluids run forward through the nose instead of downward into the gullet. At the same time the speech becomes nasal. Frequently the paralysis affects the eye muscles the patient loses the power of focusing with the result that the objects at which he looks appear blurred. Ordinarily, the muscles of the throat and eyes are the only ones affected but in the more severe cases the paralysis extends to the muscles of respiration and to those of the extremities. In rare cases the sufferer is so completely paralysed as to be entirely helpless.

The most serious cases are those in which the paralysis attacks the chest muscles, which are concerned in the respiratory movements, or in which the great nerve—the vagus—that carries impulses and gives tone to the heart and the stomach becomes involved. Very often there is more or less pain in the affected parts because of the accompanying neuritis; sometimes there is loss of sensation in the hands and the feet. When the chest muscles are paralyzed the breathing becomes difficult; it is then carried on chiefly by the diaphragm, and is made somewhat easier if the patient grasps the head of the bed with his hands. When the paralysis involves the heart and stomach nerve the patient suffers greatly from vomiting of food, and the heart symptoms—weakness and irregularity of pulse—are pronounced. That is the most dangerous of all forms of diphtheritic paralysis, for the heart is seriously weakened, and the least exertion of the patient even turning in bed, may cause it to stop.

In most cases, especially when the disease attacks the palate muscles or those of the eyes alone, perfect recovery takes place in a month or two; but when the paralysis has extended to the extremities it persists much longer and may never entirely disappear. The treatment should be of a tonic character with a nutritious diet that contains an abundance of fat, especially butter and cream. When the muscles of the body and the limbs are affected, massage is useful, and in most cases after the acute symptoms have subsided, electricity properly applied is of great service.

## Poor Quality High At Any Cost.

The talking machine industry is one of the largest in America, and probably no product has so wide distribution. Easily the leader, the Victrola reigns supreme in all lands. Prices are fixed on instruments and records, and it is a rare thing that a customer even suggests a reduction, so well known is this fact. We have never sold an item of Victor goods at a cut price, and nobody has ever had an offer of this kind from us. Prices on other machines vary according to the individual customer, few, if any, paying the full price, but Victor goods are not distributed on any basis except a fair one. Get most for your investment by purchasing a Victrola, the machine without regrets.

The J. L. Roark Estate, Orien L. Roark, Manager.

Every talking machine in the world is fitted to play Victor records and this recognition of Victor supremacy should be followed by users of other machines. Roark carries in stock more records than all agents in the county combine, and you can hear any record you wish, and your visits are urged.

If you do not have music in your home, you have no foundation on which so many other vital things must rest. Get ALL music, as well as the best in literature, on the Victrola. Roark county distributor, has placed more than 250 instruments in the county, and his easy terms will enable anyone to own a machine.

The remnant clearance sale of wallpaper by Roark offers some excellent rooms at most attractive prices.

# NOTICE

Under the new laws the Tax Commissioner is required to open an office in the Court House from July 1st. to November 1st. This law requires each and every one to come and give his lists at my office. As there are over 8,000 lists to be made in the County you will see it is important that you come at once and give in your lists.

C. W. CISNEY,  
Tax Commissioner.

## RED CROSS FAMILY REMEDIES

Many able Chemists and Doctors were called into service in perfecting this line of Red Cross Remedies. This is an age of Specialists, and while one may have distinguished achievements to his credit in one particular line, another is excelling in something else. That very thing makes it possible for us to have a Red Cross Remedy for each ailment, and enables us to give the consumer more than we promise or charge for. Each formula is compounded with as much care and precision as if our entire success depended upon that one Remedy. That's why NEURITONE repairs shattered nerves, and Red Cross STONE ROOT and BUCHU puts your kidneys in a normal and healthy condition. Red Cross Remedies are not Patent Medicines. The formula is printed on each carton in plain English, so that you know what they are composed of and what you are taking. More than one hundred Red Cross Remedies and Toilet Preparations are sold and guaranteed only by

R. F. Jarvis, Greenville, Ky.

## Paint-Without Mystery

Buy paint that you know is good—paint that there's no mystery about. On the back of every can of Hanna's Green Seal Paint you'll find the exact formula of its contents. Thus you take nothing for granted in buying Green Seal. It tells you just what goes to make up its ingredients.

## Hanna's Green Seal

is the good-wearing, good-looking paint that expert painters prefer. Try it.

This is the Victrola

## Why children need the Victrola

It's a playmate to them. Keeps them out of mischief. Plays for them to dance or romp—or sings and tells them stories.

But it gives something greater than amusement. A Victrola in the home helps shape the spiritual and mental growth of children, helps form their characters and tastes, helps educate them. And it's a great help to every mother!

Is there a Victrola in your home? You may think you can't afford one, but we'll show you that you can. You'll say you never heard of more generous terms than ours. Victrolas \$15 to \$50. Come in today and hear yours.

## POULTRY FACTS

### MORE CHICKENS ARE WANTED

Farmers Are Urged by Department of Agriculture to Stock Their Farms With More Poultry.

(From the United States Department of Agriculture.)

The United States department of agriculture urges as many as possible of the farmers who have not raised chickens to stock their farms this year with poultry, enough at least to supply the needs of their own households. This will be a big factor in the nationwide campaign which will endeavor to double this year the chicken and egg production of the United States. According to the last census, of the 6,371,302 farms in the United States, 1,247,743 reported no egg production. The more chicken-and-egg campaign is expected to displace millions of pounds of beef and pork in American menus and send the released product across the ocean to our soldiers, the allies, and the hungry people of the lands devastated by the Russian war torch.

The department does not advise that the general farmer embark in extensive raising of poultry, but warns against such ventures. But it does no reason why every farm should not produce enough chickens and eggs for its own use, and why there should not be enough surplus to make chickens and eggs available to the general public at reasonable prices and in such quantities that there will be markedly less domestic demand for the meats that are needed abroad and that can be transported there.

### LIMBER NECK IN CHICKENS

Affliction Caused by Pteridine Poisoning From Eating Decaying Fish—Try to Prevent.

Limberneck in chickens is caused by pteridine poisoning from eating decaying fish. Where fowls run at large they frequently pick up dead fish, mussels or other animals and in this way become affected with the poisons which quickly cause death. Whole flocks are sometimes wiped out in the course of a few weeks.

Prevention is the best remedy. If you are losing chickens from this cause shut up the flock and feed them on sound, sweet grain and feed. A simple effective treatment is to use permanganate of potash. Put an

Bad Case of Wry Neck.

ounce of the crystals in a quart bottle and fill it with water. Add enough of this to the drinking water to give it a rich purple color, and allow the fowls no other water to drink. Fowls which show symptoms of the disease should be given a dose night and morning.

### FOWLS EAT WASTE MATERIAL

On Some Farms Chickens Pay for Themselves by Destruction of Injurious Insects.

(From the United States Department of Agriculture.)

Chickens as a by-product of general farming do much of their feed in the waste materials that otherwise would serve no useful purpose. The attention and labor they require can be given largely even by children, and should not require the employment of additional hired workers. On some farms the chickens pay for themselves by themselves by their destruction of orchard and vegetable insects. On others they help to pay for themselves by their production of manure, which when properly used largely increases the value of the land. Fifty fowls will annually produce at least a ton of manure that can be made as valuable as commercial fertilizer.

### WHY HATCH EARLY.

(Prepared by the United States Department of Agriculture.)

Chickens hatched early in the spring are large in the summer, mature early in the fall, and lay eggs in the winter. They will sit early the following spring, produce earlier chickens—and the process will be repeated by the offspring.

But the chickens hatched late in the spring will not mature until late in the fall—so late that they will not lay in the winter. They will not sit until late in the following spring—and again the process will be repeated.

The fact finds that the argument in favor of early hatching is especially this year.

## FARM STOCK

### FEEDING SILAGE TO STOCK

No Better or More Economical Feed as Roughage for Finished Stock for Market.

(Prepared by the United States Department of Agriculture.)

As a roughage for finished stock there is no better or more economical feed than silage for it produces large daily gains and aids in keeping the animals in a healthy condition so that they can handle other feeds more effectively. An advantage in feeding silage to beef cattle that is often overlooked, is that it enables the feeder to carry his stock for a long time so as to pass over a period of depression in the market.

Silage also can be profitably used to supplement pastures for steers during a time of drought, when they are being finished for market.

For many years the belief was general that cattle which received silage as a major portion of the roughage would have to be kept in warm barns and not exposed to the cold. While they do need protection from the cold winds and rains and need a dry place to lie down, it has been clearly demonstrated that warm barns are not only unnecessary, but that fattened cattle make both larger and cheaper gains when fed in the open sheds than when confined in barns. Stocker or thin cattle receiving silage will, of course, need more protection than animals which are being fattened.

The theory that silage-fed cattle shrink very heavily in shipping to market is erroneous. While the actual shrinkage during transit is sometimes greater, the fill taken at market is usually good, and if good judgment is used in preparing them for shipping the net shrinkage is no greater than for cattle which have been fed on dry feeds. For 35 hours previous to shipping bright hay and clover should be substituted for the silage in the ration.

The general impression that choice or prime carcasses cannot be made by the use of succulent feed is equally untrue, as the silage-fed cattle usually make more desirable carcasses than cattle fed a similar ration, except that silage was replaced by one of the coarse fodders. There is no appreciable

Superior Beef Type.

difference in the percentage of marketable meat that steers will dress out which have been finished on a silage ration and a dry ration. The meat seems equally bright and the fat as well intermixed with the lean.

If silage makes up the bulk of the roughage it will be necessary to handle great amounts of bedding into the sheds to keep the animals dry, as there is no waste in silage, or else make a cement floor and cover with bedding to absorb the urine and prevent the animals from slipping and to give them a warm place to lie down. When the enormous saving in the quality and amount of the feed is considered, this disadvantage does not seem so hard to overcome by the stockman who has the capital to put up the silo and pave his feed sheds or feed lots.

### FEED WORK HORSES ALFALFA

Bad Practice to Fill Manger Morning, Noon and Night and Let Animals Eat All They Want.

The method practiced by a majority of those who have been feeding alfalfa to work horses has been to fill the manger morning, noon and night, allowing the horse to eat all he wishes. Practice has been found in this way without any serious results, but not so in the case of alfalfa hay. Alfalfa hay is very palatable and horses can very large amounts. Excessive intemperance and soft, "windy" horses that are puffed in the flanks, scoured on the legs and unable to endure hard work result. This has been the experience of hundreds of horsemen. The trouble is with the method.

Roark, Greenville, Ky.

## DAIRY

### SKIMMED MILK FOR CALVES

Since Most of Fat Has Been Removed in Cream Carbohydrates Needed to Make It Balanced.

Skimmed milk is a little richer in protein than whole milk, but lower in carbohydrates. Since most of the fat has been removed in the cream the skimmed milk will need carbohydrates to make it a balanced ration for calves.

A good plan is to replace a portion of the whole milk with skimmed milk gradually increase the skimmed milk with some form of carbohydrates till all of the whole milk is replaced by skimmed milk. Fine ground meal is one of the best carbohydrate supplements to be fed with skimmed milk. Some feeders cook the meal, stir it to the calf. After the calf is two weeks old it will eat fine ground meal and it fed small quantities will assimilate it. Luscious meal is also used.

Care should be taken in feeding calves. They should be taught to drink from the pail as soon as possible. Nothing but clean vessels should be used and the milk should be clean and warm.

### CLEAN UTENSILS ARE URGED

High Grade of Milk Cannot Be Obtained if Pails and Cans Are Not Thoroughly Washed.

(By E. H. FARRINGTON, Wisconsin Agricultural College.)

All efforts to supply the consumers with sweet, clean milk are useless if the milk pails, the cans, and other utensils are not thoroughly washed and scalded before milk is poured into them. Milk sours so quickly and it is so difficult to remove the sour odor from the utensils that these should be washed immediately after they are used.

(1) Milk pails and cans should be smooth, with all cracks and seams

Separator in Clean Room.

flushed with suds. Stainless pails and cans have been placed on the market.

(2) When washing utensils, first rinse off the film of milk on the surface with cold water, then wash thoroughly with warm water and cleaning soda, using a brush, and finally rinse with scalding hot water and place in the sun or some place free from dust to dry.

(3) After scalding, do not wipe milk utensils with a cloth, but let the rinsing water be so hot that there is no further need of drying.

### CHAPPED TEATS ARE VEXING

Where Cows Wade Around in Muddy Yards and Pastures, Teats Often Get Wet and Cold.

Some teats of any kind are very unpleasant, both to the cow and the milker. A cow having sore teats of any kind does not stand still during milking. She keeps moving about and even kicking.

During spring chapped teats are common. The cows wade around in muddy yards and even in ponds in the pasture, the teats get wet and cold, and if no special attention is given to the cows, the teats frequently become very sore.

### HIGH-PRICED FEED ANNOYING

Dairymen Depending on Profit From Cows for Living Must Know Just What He Is Doing.

Now that the cost of cow feed is soaring skyhigh and the dairymen is depending on the profit from his cows for his living it is a self-evident fact that he must know what he is thinking about. One thing is certain, the poor feeder to the poor cow is not in the race and the sooner he gets out the better, even if he must live on a work for the man who knows how to do his own thinking.

### RETAIN BULL UNTIL TESTED

Not Good Policy to Sell to Butcher After Two Years' Service—May Prove to Be Valuable.

After a young or untried bull has been used two years he should not be sold to the butcher, because he may prove to be a bull of exceptional worth when his daughters freshen. Such a bull often can be kept or leased to a man with a grade herd for a couple of years until some of his daughters freshen. In this way he always is subject to sell in case he proves especially valuable.

## LIVER DIDN'T ACT DIGESTION WAS BAD

Says 65 year Old Kentucky Lady, Who Tells How She Was Relieved After a Few Doses of Black-Draught.

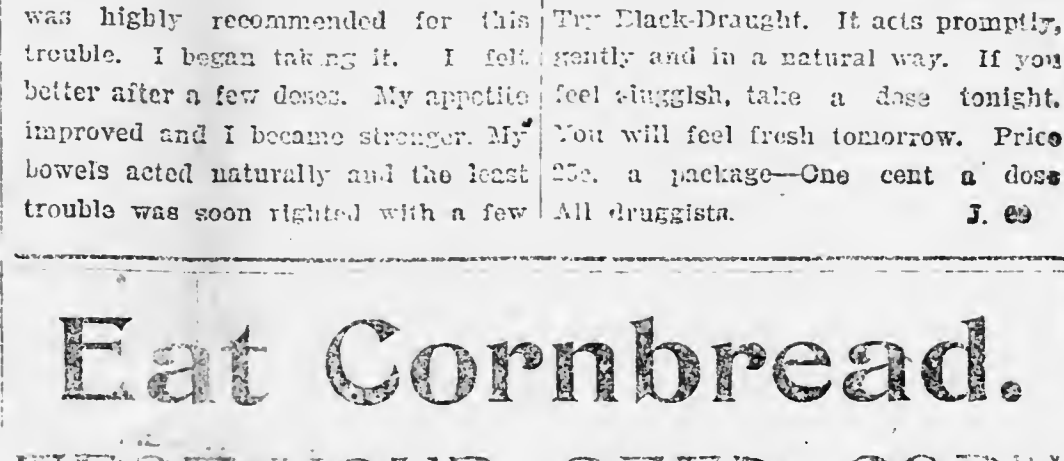

Meadowville, Ky.—Mrs. Cynthia Higginbotham, of this town, says: "At my age, which is 65, the liver does not act so well as when young. A few years ago, my stomach was all out of fix. I was constipated, my liver didn't act. My digestion was bad, and it took so little to upset me. My appetite was gone. I was very weak."

I decided I would give Black-Draught a thorough trial as I knew it was highly recommended for this trouble. I began taking it. I felt better after a few doses. My appetite improved and I became stronger. My bowels acted naturally and the least trouble was soon righted with a few

doses of Black-Draught."

Seventy years of successful use has made Black-Draught a standard, household remedy. Every member of every family, at times, need the help that Black-Draught can give in cleansing the system and relieving the troubles that come from constipation, indigestion, lazy liver, etc. You cannot keep well unless your stomach, liver and bowels are in good working order. Keep them that way. Try Black-Draught. It acts promptly, gently and in a natural way. If you feel sluggish, take a dose tonight. You will feel fresh tomorrow. Price 25c. a package—One cent a dose.

All druggists. J. E.
